

Generative AI Report

Technology	Description
GPT-4	A large language model developed by OpenAI that can generate human-like text based on prompts.
BERT	A pre-trained neural network model developed by Google that can understand and generate text based on context.
DALL-E	A generative AI model developed by OpenAI that can create high-quality images based on prompts.

This report provides an overview of the advancements in generative AI, including its applications, key technologies, and future trends.
